This definitive record sets out the essential features and characteristics of the BSc (Hons) Midwifery [shortened] course. The information provided is accurate for students entering level 5 in the 2019-20 academic year.⁵

Course Summary

This course provides an exciting opportunity to equip midwives for preparation for practice in the second decade of the 21st century where they will be working with increasing levels of clinical and technological complexity and more diverse populations.

¹ For an explanation of the levels of higher education study, see the [QAA Frameworks for Higher Education Qualifications of UK Degree-Awarding Bodies \(2014\)](#)

² All academic credit awarded as a result of study at the University adheres to the [Higher education credit framework for England](#).

³ Where the course is delivered both full-time and part-time, the standard length of course is provided for the full-time mode of attendance only. The length of the part-time course is variable and dependent upon the intensity of study. Further information about mode of study and maximum registration periods can be found in the [Framework and Regulations for Undergraduate Awards](#).

⁴ Details of standard entry requirements can be found in the [Admissions Policy](#)

⁵ The University reserves the right to make changes to course content, structure, teaching and assessment as outlined in the [Admissions Policy](#).

DEFINITIVE COURSE RECORD

This course will enable students to acquire appropriate knowledge, skills and attitudes to affect safe and high quality maternity care for all women and their partners. It will also equip them to develop interpersonal and negotiation skills that can be utilised within a range of multidisciplinary settings to improve choice, access and continuity of care for childbearing women and their families. This is supported by recent research into women's experiences of maternity care which identified good communication, support, involving women in their care and being treated with respect, dignity and kindness, as factors which contributed to a positive experience (Commission for Healthcare Audit and Inspection, 2007).

Students will be encouraged throughout their course in the effective use of theory in practice and the use of practice to inform theory. The integration of academic study and practice-based learning will facilitate the concept of lifelong learning and reflection, to support best practice and the maintenance of professional standards. Students will be facilitated to apply and link the theoretical constructs to practice and develop the skills of critical analysis, appraisal, synthesis and evaluation to their learning and so be empowered to question midwifery practices with assertion and confidence.

The contribution of service colleagues – managers, supervisors of midwives and mentors is valued in the delivery of this programme. The experience of service users is incorporated into the curriculum to enhance cultural sensitivity to women's needs and views. These personnel, together with past and present students have actively participated in the development of this curriculum.

Course Aims

- To provide educational opportunities which allow students to acquire the knowledge, skills, values, and attitudes that are essential for the development of safe midwifery practice, professional competence and confidence.
- To provide a broad and deep understanding of midwifery knowledge, the factors influencing the provision of women centred maternity care and to embrace birth as a normal process.
- To encourage an understanding of the role of midwives in helping to reduce the impact of health inequalities on women and families and their vital role in the public health agenda.
- To develop enquiring, confident, autonomous midwives able to question evidence and practice with confidence and through developing management and leadership qualities feel confident in their role as part of the multi-professional maternity care provision
- To facilitate the student to use analytical and enquiry based learning skills to evaluate the relationship between the individual childbearing experience, theoretical constructs and evidenced based knowledge.
- To encourage independent learning and a commitment to lifelong learning, including taking responsibility for continuing professional development as a requirement for maintaining professional competence and confidence.
- To fulfil the requirements of the EU Directives NMC Standards for Pre-registration Midwifery Education and QAA academic and practitioner standards.

DEFINITIVE COURSE RECORD

Course Learning Outcomes

The following statements define what students graduating from the BSc (Hons) Midwifery [shortened] course will have been judged to have demonstrated in order to achieve the award. These statements, known as learning outcomes, have been formally approved as aligned with the generic qualification descriptor for level 6 awards as set out by the UK Quality Assurance Agency (QAA).⁶

At the end of level 6 students will be able to:

Knowledge and understanding and cognitive skills

1. Critically analyse the evidence to support decisions made as a lead professional in midwifery care
2. Achieve competency in the range of skills appropriate to midwifery identified by the NMC (2009) and European Midwives Directives 2005/36/EU Annexe V Point 5.5.1
3. Critically analyse the use of technology and intervention in providing safe and ethical maternity services
4. Organise, manage and evaluate care of childbearing women and their families including prioritising care
5. Confidently apply knowledge base to undertake emergency procedures and refer to appropriate professional when required
6. Critically compare and assess the multiple ideological influences within contemporary midwifery practice

Subject specific skills

7. Critically reflect on the effectiveness of personal and professional judgement to achieve the best possible birth outcome for mother and baby
8. Critically appraise the public health role of the midwife
9. Utilise strategies, which will assist with the integration of choice and implementation of continuity of care for childbearing women
10. Appreciate a wide range of methodological approaches to achieving evidence based midwifery care and midwifery perspectives to promote childbearing as a normal process
11. Articulate the regulatory requirements for midwifery practice and code of professional conduct

Key/ common skills

12. Demonstrate qualities, including effective communication, initiative and proactive approaches, self-reflexivity and problem solving skills in a variety of theoretical and practical settings

⁶ As set out in the [QAA Frameworks for Higher Education Qualifications of UK Degree-Awarding Bodies \(2014\)](#)

DEFINITIVE COURSE RECORD

13. Critically analyse, interpret and apply the evidence underpinning practice and evaluate, challenge and create change in practice accordingly
14. Engage in effective collaboration with women and their families and other health and social care professionals
15. Formulate strategies to develop their own lifelong learning and continuing professional development and demonstrate confidence in transferable Graduate Headstart skills

Course Design

The design of this course has been guided by the following Professional Standards and NMC Competency Frameworks:

Professional Standards:

- NHS Knowledge and Skills Framework

NMC Competency Frameworks:

- NMC Standards of Proficiency

Course Structure
