This definitive record sets out the essential features and characteristics of the BA (Hons) Politics and Economics course. The information provided is accurate for students entering level 4 in the 2018-19 academic year⁵.

Course Summary

Politics is about power and one of the main sources of power is wealth derived from the economy. The study of politics and economics are therefore firmly interlinked and there is a strong tradition of seeing them as linked in higher education. The curriculum is designed to allow students to gain firm foundations in each subject alongside an important range of research skills.

The politics and economics curriculum includes key aspects of politics at the University of Suffolk outlined above. The curriculum design is active in its delivery with an emphasis on group work, project work, employability and engagement with broadly defined political organisations. The economics curriculum complements this and seeks to develop a broader

and more rounded appreciation of the theories, practices and preferences which shape policy on such things as government spending, taxation and welfare policy.

All students will study research methods at each level of study with increasing independence and sophistication of approach. The use of secondary data and comparative and case study analysis will be specific to the politics and economics degree.

Course Aims

- To investigate the nature, forms, causes and consequences of politics.
- To study power and engage deeply with political theory and philosophy,
- To analyse local, national, regional and supranational power structures and their consequences for people
- To allow for an engagement with (broadly defined) political organisations through the use on group work and project work
- To develop subject specific, cognitive and employability skills for personal development, postgraduate study and a range of graduate careers
- To provide students with a critical understanding of the key principles of economics and their application.
- To generate an appreciation of the economic and welfare dimensions of wider social, political, legal and environmental issues.
- To ensure a firm foundation of knowledge about the workings of national and global economies, the development of relevant skills, including the usage of appropriate tools of analysis of economic phenomena to support business decision-making in a range of settings.
