This definitive record sets out the essential features and characteristics of the MSc Advanced Clinical Practice [degree apprenticeship] course. The information provided is accurate for students entering level 7 in the 2020-21 academic year.5

Course Summary
This course is designed to facilitate the development of knowledge and skills related to advanced clinical practice. Course development has been informed by and mapped to nationally accepted frameworks for advanced clinical practice (Health Education England, 2018) and the Integrated Degree Apprenticeship Standard (Skills for Health, 2018) thus ensuring that the course is relevant to contemporary practice. Evidence of successful completion of this course can support you in evidencing your learning and development when

---

1 For an explanation of the levels of higher education study, see the [QAA Frameworks for Higher Education Qualifications of UK Degree-Awarding Bodies (2014)](https://qaa.ac.uk/documents/qaa-standards-frameworks/). Modules are designated as either mandatory (M), requisite (R) or optional (O). For definitions, see the [Framework and Regulations for Taught Postgraduate Awards](https://www.jisc.ac.uk/Pages/StudentPaymentsFinancialSupport/Pages/Framework-and-regulations.aspx).
2 All academic credit awarded as a result of study at the University adheres to the [Higher education credit framework for England](https://www.heqco.ac.uk/credit-framework/).
3 Where the course is delivered both full-time and part-time, the standard length of course is provided for the full-time mode of attendance only. The length of the part-time course is variable and dependent upon the intensity of study. Further information about mode of study and maximum registration periods can be found in the [Framework and Regulations for Taught Postgraduate Awards](https://www.jisc.ac.uk/Pages/StudentPaymentsFinancialSupport/Pages/Framework-and-regulations.aspx).
4 Details of standard entry requirements can be found in the [Admissions Policy](https://www.suffolk.ac.uk/undergraduate-students/admissions/) and further details about Disclosure and Barring Checks (DBS) can be found on the [University’s DBS webpage](https://suffolk.ac.uk/undergraduate-students/admissions/dbs/).
5 The University reserves the right to make changes to course content, structure, teaching and assessment as outlined in the [Admissions Policy](https://www.suffolk.ac.uk/undergraduate-students/admissions/).
University of Suffolk

DEFINITIVE COURSE RECORD

applying for career development and advancement in roles associated with an advanced level of clinical practice.

Course Aims

1. Enable students to engage in critical debate of issues pertinent to the roles and responsibilities within advanced professional practice and respond to them appropriately

2. Develop practitioners who are able to work in a professionally autonomous way demonstrating leadership within their area of practice and who are accountable for their own professional and clinical decisions

3. Enable students to critically evaluate personal and professional development needs in relation to advanced professional practice and implement appropriate responses

4. Enable students to meet the challenges of undertaking research at master’s level within their field of practice

5. Develop an individual who is able to act as a role model and an educator to initiate change and management development opportunities within the clinical setting

Course Learning Outcomes

The following statements define what students graduating from the MSc Advanced Clinical Practice [degree apprenticeship] course will have been judged to have demonstrated in order to achieve the award. These statements, known as learning outcomes, have been formally approved as aligned with the generic qualification descriptor for level 7 awards as set out by the UK Quality Assurance Agency (QAA)6.

On completion of the MSc Advanced Clinical Practice [degree apprenticeship], students will be able to:

Knowledge and understanding and cognitive skills

1. Independently propose and evaluate alternative approaches to person-centred practice.

2. Critically appraise conceptual models, theories and vocabulary in the subjects covered within the course.

3. Deal with complexity and contradiction in knowledge proffered for practice.

4. Make sound judgments in the absence of complete data.

5. Discern between different research methods and their suitability for undertaking research in specific areas of person-centred, compassionate care.

6. Demonstrate systematic knowledge, understanding and critical awareness of current problems within their field of practice.

---

6 As set out in the QAA Frameworks for Higher Education Qualifications of UK Degree-Awarding Bodies (2014)
7. Synthesise information and ideas and develop a creative approach to problem solving in advanced clinical practice.

8. Engage with colleagues to discuss and critically debate a variety of perspectives.

9. Critically evaluate the impact of health and social care policy on patients/clients/relevant others and health care practitioners and evaluate the culture of the specific clinical area of work in relation to the institution in which they work.

10. Critically evaluate current research and advance scholarship in their field of practice.

11. Meet the challenge of undertaking research at this level.

**Subject specific skills**

1. Demonstrate expertise in a variety of contexts within their field of practice.

2. Effectively engage others in the delivery of enhanced, person-centred care.

3. Take responsibility for personal and professional development in relation to advanced practice.

4. Work as an autonomous practitioner within an inter-professional team that values person-centred care.

5. Demonstrate the ability to deliver an appropriate range of interventions based on the situation of the patient.

6. Identify the scope and limitations of their role, including critically evaluating legal and ethical implications with respect to other members of staff, local and national policies and frameworks.

7. Independently design, plan, manage and evaluate a research project pertinent to their field of professional practice.

8. Demonstrate an understanding of the significance of research findings to their profession.

**Key / common skills**

1. Critically analyse and appraise existing sources of information.

2. Critically evaluate elements of management and leadership in relation to the advanced practice role.

3. Demonstrate the ability to present complex arguments to a group in a competent manner.

4. Demonstrate self-reflectivity and an awareness of the need for continuing professional development.

5. Work collaboratively with others within health care and the wider environment to enhance the understanding of advanced clinical practice.

6. Utilise problem-solving skills in a variety of theoretical and practical settings.
7. Demonstrate an ability to communicate complex issues and arguments in writing to specialist and non-specialist audiences

Course Design
The design of this course has been guided by the following QAA Benchmarks / Professional Standards / Apprenticeship Standards:

Course Structure
The MSc Advanced Clinical Practice [degree apprenticeship] comprises modules at levels 7

Module Specifications for each of these modules are included within the course handbook, available to students on-line at the beginning of each academic year.

7 Modules are designated as either mandatory (M), requisite (R) or optional (O). For definitions, see the Framework and Regulations for Taught Postgraduate Awards.
Integrated End Point Assessment modules, students will be awarded the MSc Advanced Clinical Practice.

Course Delivery, Assessment and COVID-19
Our guiding principles for delivery during the 2020-21 academic year will be based around a rich blended learning environment, which will include some online delivery of lectures as well as face to face delivery of seminars, lab work and tutorials as applicable. Where possible assessment will be undertaken as planned and where this is not possible, e.g. on-site examinations, an equivalent assessment will be made available to students. We do not intend to have a fully online academic year for any of our students.

Our campus will be safe and welcoming for new and returning students, but we will observe – as all universities must – the government guidance in place at the time and so the delivery and assessment statements below are under continuous review as circumstances change.

Course Delivery
The course is delivered at Ipswich. Attendance is usually required for one full study day on alternate weeks although this may vary slightly depending on the module being studied. During the apprenticeship, 20% of the students usual working hours will be given as time for study towards modules and the assessment involved in these. Students will be required to complete tripartite reviews on a termly basis. These will be carried between the student, the employer and the University of Suffolk. In general terms, this will equate to one working day a week being allocated for study purposes. In between the study day attendance at the University on alternate weeks, students will be involved in indirect study activities with the course team. This may include learning activities which supplement the core content and link to the students area of practice, for example, to explore the rationale for a service policy change. These will be delivered via the OLE Brightspace with support and guidance available from the course team. The team will offer support and guidance for self-directed study activities throughout the programme.

Course Assessment
A variety of assessments will be used on the course to enable students to experience and adapt to different assessment styles. The assessment methods used will be appropriate to assess each module’s intended learning outcomes. Assessment on the course will include essays, seminar presentations and one written examination and one Objective Structured Clinical Examination during year one and a combination of essays, seminar presentations, examinations and Objective Structured Clinical Examinations during year two. Year three of the course is dedicated to the development and preparation of a dissertation as the final submission for the course.

End Point Assessment
All students on the course undertake an End Point Assessment (EPA) to complete their Advanced Clinical Practitioner (Degree). Students will be expected to undertake the EPA as part of their degree. The EPA will be delivered by the University and assessed by a separate training provider. The EPA will be approximately 50% coursework (including essays, reports, presentations, group work, reflective learning journals and research projects and 50% examinations. Following successful completion of the EPA students will achieve their Advanced Clinical Practitioner (Degree).

Special Features
The MSc Advanced Clinical Practice [degree apprenticeship] course meets the requirements of the Advanced Clinical Practitioner (degree) apprenticeship standard.
University of Suffolk

DEFINITIVE COURSE RECORD

Course Team
The academic staff delivering this course are drawn from a team that includes teaching specialists and current practitioners. All staff are qualified in their subjects with their own specialist knowledge to contribute.

Course Costs
Students undertaking MSc Advanced Clinical Practice [degree apprenticeship] will not be charged tuition fees directly. Tuition fees will be agreed between the University and a student’s employer. Students will be required to sign a commitment statement before starting their apprenticeship which will detail the student’s, employer’s, and University’s expectations under the apprenticeship agreement.

Academic Framework and Regulations
This course is delivered according to the Framework and Regulations for Undergraduate Awards and other academic policies and procedures of the University and published on the website.
