DEFINITIVE COURSE RECORD

This definitive record sets out the essential features and characteristics of the BSc (Hons) Applied Psychology course. The information provided is accurate for students entering level 4 in the 2020-21 academic year.

Course Summary
The application of psychology and psychological principles is increasing in relevance and importance within a number of sectors and can be critical in many fields where human interaction is at the core. This programme encourages students to reflect on the skills required to establish and maintain good working relationships with others and to gain an understanding of the variety of ways in which individuals learn and develop. The understanding and knowledge of human development gained on the course will help students to actively support and work effectively either independently or with fellow professionals to support individuals, families, carers, the wider community and other stakeholders in current or intended career roles.

Course Aims
- To enhance the students’ capacity to evaluate evidence and to develop the critical skills of reflection, evaluation and argument to support their development;
- For students to identify the origins and key components of theories and to critically analyse the contexts of evidence;
- To enable the student to critically identify the contribution of psychology to supporting children’s, young peoples’ or adults’, individual, emotional, social and developmental potential;
- To encourage development of specific and generic skills/transferable skills of value in employment, further study and personal and professional development;
- To encourage advanced scholarship of the subject through a critical evaluation and analysis of methodologies and previous/current research and to provide the student with the opportunity to investigate an area of particular interest.
