

DEFINITIVE COURSE RECORD

Course Title	BSc (Hons) Games Programming (with Professional Placement)
Awarding Bodies	University of Suffolk
Level of Award ¹	FHEQ Level 6
Professional, Statutory and Regulatory Bodies Recognition	None
Credit Structure ²	360 Credits Level 4: 120 Credits Level 5: 120 Credits plus 120 placement credits* Level 6: 120 Credits For an award 'with Professional Placement', 120 placement credits are required.
Mode of Attendance	Full-time
Standard Length of Course ³	4 years full-time
Intended Award	BSc (Hons) Games Programming (with Professional Placement)
Named Exit Awards	DipHE Games Programming (with Professional Placement) DipHE Games Programming CertHE Games Programming
Entry Requirements ⁴	Typical Offer: 112 UCAS tariff points (or equivalent)
Delivering Institution	Ipswich
UCAS Code	I600

This definitive record sets out the essential features and characteristics of the BSc (Hons) Games Programming (with Professional Placement) course. The information provided is accurate for students entering level 4 in the 2021-22 academic year⁵.

Course Summary

Games Programming involves the development of computer games, from initial designs through to technical implementation and release. Working hand in hand with students from the BA (Hons) Games Design course, students on Games Programming are introduced to working in small groups, using industry standard project management techniques to develop their games. The course aims to get students developing games as soon as they step in the door, each year of study builds upon the last providing students with a solid framework from which they can specialise.

¹ For an explanation of the levels of higher education study, see the [QAA Frameworks for Higher Education Qualifications of UK Degree-Awarding Bodies \(2014\)](#)

² All academic credit awarded as a result of study at the University adheres to the [Higher education credit framework for England](#).

³ Where the course is delivered both full-time and part-time, the standard length of course is provided for the full-time mode of attendance only. The length of the part-time course is variable and dependent upon the intensity of study. Further information about mode of study and maximum registration periods can be found in the [Framework and Regulations for Undergraduate Awards](#).

⁴ Details of standard entry requirements can be found in the [Admissions Policy](#) and further details about Disclosure and Barring Checks (DBS) can be found on the [University's DBS webpage](#).

⁵ The University reserves the right to make changes to course content, structure, teaching and assessment as outlined in the [Admissions Policy](#).

DEFINITIVE COURSE RECORD

The additional sandwich year at the end of Level 5 enables students to engage in a full year professional placement (either in the UK or overseas). The professional placement provides a valuable opportunity for students to put theory into real-life practice, enhancing their skills and understanding and expanding their professional networks.

Course Aims

- To provide extended opportunities for students to demonstrate their knowledge of games programming theory and practice;
- To allow students to demonstrate, through extended negotiated project work, their ability to apply appropriate knowledge and skills for their professional development;
- To produce graduates who are confident in the design and development of computer software for a range of diverse uses and formats;
- To enable students to demonstrate problem solving and evaluation skills through independently negotiated work;
- To offer students the opportunity to demonstrate their autonomous control over the production of a range of game related software for different audiences and purposes;
- To offer, through extended project work, the opportunities for students to demonstrate fully their abilities to act as independent learners and reflective practitioners;
- To offer students the opportunity to develop a body of negotiated work that demonstrates closely the link between the practical artefacts being produced and the underpinning theory that has informed it;
- To offer, through extended project work, the opportunities to students to communicate their vision and research skills to diverse audiences;
- To provide extended opportunities for students to demonstrate their ability to act as independent learners synthesising their knowledge and skills in novel and innovative ways;
- To provide opportunities for students' knowledge, skills and experience to be transferred to others within a clearly structured, supportive and interdisciplinary learning environment;
- To produce graduates who are able to make a contribution to widening access to computer games education in the region, supporting both the strategic regional aims of the university and their key stakeholders.

Course Learning Outcomes

The following statements define what students graduating from the BSc (Hons) Games Programming (with Professional Placement) course will have been judged to have demonstrated in order to achieve the award. These statements, known as learning outcomes, have been formally approved as aligned with the generic qualification descriptor for level 6 awards as set out by the UK Quality Assurance Agency (QAA)⁶.

⁶ As set out in the [QAA Frameworks for Higher Education Qualifications of UK Degree-Awarding Bodies \(2014\)](#)

DEFINITIVE COURSE RECORD

The following statements define abilities that students graduating from the BSc (Hons) Games Programming (with Professional Placement) course will have been judged to have demonstrated in order to achieve the award. These statements, known as learning outcomes, should be considered alongside the generic qualification descriptor for Level 6 awards as set out by the UK Quality Assurance Agency (QAA) and included in Appendix 1.

At the end of the course students will be able to:

Subject Specific Knowledge and Understanding

1. The ability to demonstrate through a variety of written forms a sustained application of accurate software development theories and knowledge to the production of a range of game engines and related artefacts.
2. The knowledge to produce sophisticated artefacts that demonstrate best practice in their field commensurate with level six undergraduate standard.
3. The skills required to critically evaluate the requirements of external briefs and prioritise key processes and techniques for their completion.
4. A sophisticated understanding of audiences requirements, demonstrated through artefacts created.

Behavioural and Cognitive Key Skills

5. The skills to gather, sort and synthesise detailed relevant information recognising their own current limits to knowledge.
6. The ability to negotiate and execute a brief to an advanced standard, applying relevant skills and knowledge.
7. An ability to revise software implementation in an iterative way based on feedback from multiple sources and to accurately document and audit this process.
8. The skills required to critically reflect on, evaluate and communicate to diverse audiences, in a variety of formats, work undertaken.
9. The ability to produce work independently and act proactively to achieve high quality outcomes.
10. Advanced understanding of project management methods through sustained practical application.

Course Design

The design of this course has been guided by the following:

- QAA Subject Benchmark for Computing (2019);
- International Games Developers Association – Games Design, Development and Studies;
- ScreenSkills Undergraduate Course Accreditation Guidelines for Computer Games.

Course Structure

The BSc (Hons) Games Programming (with Professional Placement) comprises modules at levels 4, 5 and 6.

Module Specifications for each of these modules are included within the course handbook, available to students on-line at the beginning of each academic year.

DEFINITIVE COURSE RECORD

	Module	Credits	Module Type ⁷
Level 4			
	Introduction to Game Development	30	R
	Group Project	20	R
	Algorithms and Data Structures	20	R
	Introduction to Programming	20	R
	Maths for Software Development	20	R
	Introduction to Critical Games Studies	10	R
Level 5			
	Managing Games Production	20	M
	Artificial Intelligence for Games	20	R
	Tools Programming	20	R
	Game Engine Development	20	R
	Programming for Graphics	20	R
	Games Research Methods	20	M
Level 5 sandwich year with professional placement only (leading to placement credit)			
	Professional Practice	120	M
Level 6			
	Games Studio Experience	20	R
	Professional Practice	20	R
	Indie Game Development	40	R
	Honours Project	40	M

Awards

On successful completion of the course, students will be awarded a BSc (Hons) Games Programming (with Professional Placement).

Students who leave the course early may be eligible for a DipHE Games Programming on successful completion of 240 credits including all mandatory modules at levels 4 and 5.

Those students who leave the course early and, in addition to the above, have successfully completed the sandwich year and have been awarded 120 placement credits may be eligible for DipHE Games Programming (with Professional Placement).

Students who leave the course early on successful completion of 120 credits including all mandatory modules at level 4 may be eligible for a CertHE Games Programming.

Course Delivery

The course is delivered at Ipswich. Students studying full-time on BSc (Hons) Games Programming (with Professional Placement) are likely to have approximately 16 contact hours per week for level 4, 14 contact hours per week for level 5 and 4 contact hours per

⁷ Modules are designated as either mandatory (M), requisite (R) or optional (O). For definitions, see the [Framework and Regulations for Undergraduate Awards](#)

DEFINITIVE COURSE RECORD

week for level 6. The contact hours will be a mix of e.g. lecture, seminar and practical activity. Students will normally be expected to undertake 30 hours of independent study in an average week, but should be prepared for this to vary based on assignment deadlines and class exercises. For the sandwich year involving a full year of professional practice, students are expected to engage in 1090 hours of professional practice (including 30 weeks of supervised and relevant work experience), 10 hours of tutorials and online support and 100 hours of independent study.

Course Assessment

A variety of assessments will be used on the course to enable students to experience and adapt to different assessment styles. The assessment methods used will be appropriate to assess each module's intended learning outcomes. Assessment on the course overall will be almost all coursework (including essays, reports, presentations, group work, reflective learning journals and research projects).

Course Team

The academic staff delivering this course are drawn from a team that includes teaching specialists and current practitioners. All staff are qualified in their subjects with their own specialist knowledge to contribute.

Course Costs

Students undertaking BA (Hons) Games Programming (with Professional Placement) will be charged tuition fees as detailed below:

Student Group	Tuition Fees
Full-time UK	£9,250 per year (excluding sandwich year, for which the fee will be £1,850 for the year)
Part-time UK	Not applicable
Full-time EU/International	£13,725 per year (excluding sandwich year, for which the fee will be £2,875 for the year)
Part-time EU/International	Not applicable

Payment of tuition fees is due at the time of enrolment and is managed in accordance with the Tuition Fee Policy.

Academic Framework and Regulations

This course is delivered according to the Framework and Regulations for Undergraduate Awards and other academic policies and procedures of the University and published on the [website](#).
