### Course Summary

The Foundation degree is an employment-based higher education qualification set out by the Department for Education and Skills. It offers students a mix of work-related specialist skills and academic study. Graduates of the FdA Health and Wellbeing (Nursing Associate) [higher apprenticeship] will be well placed to take advantage of a variety of career openings which exist in the health and care arena. This programme will be offered as part of the Higher Apprenticeship, and is mapped to the Nursing Associate Standard.

The motivation for this programme is to create for students a clear framework for practice that is underpinned by knowledge, skills, appropriate professional attitudes and accountability, critical evaluation and reflection. This is encouraged through the use of relevant and current research/literature to support students' learning. Students will be exposed to a variety of...
teaching, learning and assessment methods that will link theory to practice and practice to theory and place the service user at the centre of the learning.

It is envisaged that on completion of the course, students will be working at the level of an assistant practitioner, senior care worker or band 4 worker. These are workers that deliver care to service users under the direct supervision of a registered practitioner, with a level of knowledge and skill beyond that of the traditional health and care support worker. They take some tasks from registered professionals and may work across many of the traditional professional boundaries.

Course Aims

- To provide the students with the knowledge, understanding and associated skills that will enable them to work effectively, flexibly and responsively within their work arena
- To enable students to recognise the scope, depth and breadth of their knowledge and skills within the inter-professional team
- To provide the students with an appropriate understanding of the regulatory and legislative framework for care pertinent to their role
- To provide opportunities for students to develop key skills to prepare for further study and / or employment and lifelong learning
- To encourage the students to become active learners, thus learning through practice, rather than learning to practice
- To provide the students with the opportunity to explore methods of research relevant and appropriate to the care setting
- To enhance the students’ communication and interpersonal skills
- To facilitate the students understanding of leadership skills to enable the individual to respond flexibly to organisational and personal change
- To develop within the students’ enthusiasm for higher education learning
- To ensure that the student can contribute to meeting the challenges of enhancing health and care delivery
- To provide students with a recognised higher education qualification which gives the opportunity to access an honours degree and / or a professional qualification

Course Learning Outcomes

The following statements define what students graduating from the FdA Health and Wellbeing (Nursing Associate) [higher apprenticeship] course will have been judged to have demonstrated in order to achieve the award. These statements, known as learning outcomes, have been formally approved as aligned with the generic qualification descriptor for level 5 awards as set out by the UK Quality Assurance Agency (QAA)º.

º As set out in the QAA Frameworks for Higher Education Qualifications of UK Degree-Awarding Bodies (2014)
University of Suffolk

DEFINITIVE COURSE RECORD

Knowledge, understanding and cognitive skills

1. Transfer and apply previous knowledge, skills and understanding to new situations and contexts relevant to the students’ field of health care.
2. Develop strategies to improve their practice through critical reflection.
3. Understand the research process and its application to practice.
4. Apply rationales for care based upon current theory.
5. Understand the holistic nature of the person.

Key / transferable / lifelong learning skills

1. Demonstrate an understanding of the importance of effective verbal and written communication.
2. Recognise and work within the defined role specific scope of practice to ensure safe and collaborative delivery of health care.
3. Demonstrate leadership qualities which contribute to enhancing care delivery.
4. Use a range of techniques to plan, monitor and evaluate individual skills to improve performance.

Course Design
The design of this course has been guided by the following Professional Standards:

- NHS Knowledge and Skills Framework
- Skills for Health
- Apprenticeship Standard for Nursing Associate (Health)

Course Structure
The FdA Health and Wellbeing (Nursing Associate) [higher apprenticeship] comprises modules at levels 4 and 5.

Module Specifications for each of these modules are included within the course handbook, available to students on-line at the beginning of each academic year.

Optional modules are offered and delivered according to student demand within the second year of the Foundation degree programme. Options have been provided to support varying roles within health and care practice. Students are able to select any combination of optional modules, but examples which encompass clinical and non-clinical routes are provided in the course handbook for guidance purposes.

**Awards**

On successful completion of the course, students will be awarded a FdA Health and Wellbeing (Nursing Associate). Students who leave the course early may be eligible for a CertHE Health and Wellbeing on successful completion of 120 credits including all mandatory modules at level 4.

**Course Delivery, Assessment and COVID-19**

Our guiding principles for delivery during the 2020-21 academic year will be based around a rich blended learning environment, which will include some online delivery of lectures as well as face to face delivery of seminars, lab work and tutorials as applicable. Where possible assessment will be undertaken as planned and where this is not possible, e.g. on-site examinations, an equivalent assessment will be made available to students. We do not intend to have a fully online academic year for any of our students.

Our campus will be safe and welcoming for new and returning students, but we will observe – as all universities must – the government guidance in place at the time and so the delivery and assessment statements below are under continuous review as circumstances change.

**Course Delivery**

The course is delivered across a number of sites including Ipswich, Bury St Edmunds, Kings Lynn and Cambridge. Students studying full-time on FdA Health and Wellbeing (Nursing Associate) [higher apprenticeship] should expect to have approximately 150 contact hours for...
level 4 and 150 contact hours for level 5. In accordance with the requirements for off-the-job training within the apprenticeship standard, students will attend one day per week and the contact hours will be a mix of lecture, presentation and practical activity. In addition, students will be expected to engage with about 100 hours of on-line learning activity for each level, and students will normally be expected to undertake 15 hours of independent study in an average week, but should be prepared for this to vary based on assignment deadlines and class exercises.

Placements
Placements will be planned to provide opportunities to work in different settings and contexts with a variety of multi-professional teams in order to foster a positive practice learning experience. Students will have a range of placements throughout the course that reflect the varied working environments available to a Nursing Associate. The placement process will be informed by the Health Education England curriculum guidance (HEE, 2017) and as such, anticipated placement hours will equate to 375 hours per year of the programme.

Course Assessment
A variety of assessments will be used on the course to enable students to experience and adapt to different assessment styles. The assessment methods used will be appropriate to assess each module’s intended learning outcomes. Assessment on the course overall will be approximately 90% coursework (including essays, presentations, group work, and research projects) and may also include examinations depending on the selection of optional modules.

End Point Assessment
The end-point assessment comprises of two elements; an observation of practice and a professional discussion. The observation of practice must be undertaken prior to the professional discussion.

Observation
The observation is undertaken by the independent assessor in the apprentice’s workplace and must last for 60 minutes. The apprentice will be observed in providing nursing care to an individual, a succession of individuals or a group of individuals. Examples of ‘workplaces’ can include the individual’s home, a GP practice, hospital ward, Accident and Emergency Department, mental health or learning disability service, substance misuse service or prison.

Professional Discussion
The use of professional discussion based on two scenarios will assess the apprentice’s skills, knowledge and behaviours. The apprentice must be able to relate the scenarios to their practice.

Course Team
The academic staff delivering this course are drawn from a team that includes teaching specialists and current practitioners. All staff are qualified in their subjects with their own specialist knowledge to contribute.

Course Costs
Apprentices undertaking FdA Health and Wellbeing (Nursing Associate) [higher apprenticeship] will not be asked to contribute financially to the direct cost of learning or assessment. The total cost of the apprenticeship will be agreed between the University and an apprentice’s employer. A commitment statement must be signed before the apprenticeship starts, which sets out how the employer, University and apprentice will support the successful achievement of the apprenticeship, and is signed by all parties. This sets out the expectations and commitments of all those involved under the apprenticeship agreement.
