

DEFINITIVE COURSE RECORD

Course Title	PgC Magnetic Resonance Imaging
Awarding Bodies	University of Suffolk
Level of Award ¹	FHEQ Level 7
Professional, Statutory and Regulatory Bodies Recognition	College of Radiographers
Credit Structure ²	60 Credits at level 7
Mode of Attendance	Part-time
Standard Length of Course ³	1 year Part-time
Intended Award	PgC Magnetic Resonance Imaging
Named Exit Awards	None
Entry Requirements ⁴	<ul style="list-style-type: none"> • Holder of a BSc (Hons) Degree in Diagnostic Radiography/ Diploma of the College of Radiographers (Diagnostic Radiography) or be able to evidence the ability to study at level 7 • Current registration with the Health and Care Professions Council (HCPC) • Currently working in the field of diagnostic radiography for a minimum of one year • IELTS minimum band score 7 with reference to the HCPC guidance
Delivering Institution	University of Suffolk

This definitive record sets out the essential features and characteristics of the Postgraduate Certificate in Magnetic Resonance Imaging course. The information provided is accurate for students entering level 7 in the 2022-23 academic year⁵.

Course Summary

This course allows students to learn the theory underpinning the technical aspects of MRI. Links to practice will be made throughout the course and the successful completion of a portfolio will demonstrate an understanding and application of a range of MRI imaging protocols and parameters. Students will also develop knowledge and understanding of service delivery and innovation, the provision of effective care and leadership.

¹ For an explanation of the levels of higher education study, see the [QAA Frameworks for Higher Education Qualifications of UK Degree-Awarding Bodies \(2014\)](#)

² All academic credit awarded as a result of study at the University adheres to the [Higher education credit framework for England](#).

³ Where the course is delivered both full-time and part-time, the standard length of course is provided for the full-time mode of attendance only. The length of the part-time course is variable and dependent upon the intensity of study. Further information about mode of study and maximum registration periods can be found in the [Framework and Regulations for Taught Postgraduate Awards](#).

⁴ Details of standard entry requirements can be found in the [Admissions Policy](#) and further details about Disclosure and Barring Checks (DBS) can be found on the [University's DBS webpage](#).

⁵ The University reserves the right to make changes to course content, structure, teaching and assessment as outlined in the [Admissions Policy](#).

DEFINITIVE COURSE RECORD

Course Aims

- Knowledge, competence and understanding to achieve the level of expertise associated with Magnetic resonance Imaging (MRI)
- Intellectual and practical skills for research and enquiry, to develop an analytical, evaluative and reflexive approach to professional practice enabling effective career planning.
- Interpersonal and communication skills, in order to actively participate in a range of multi-disciplinary teams to provide optimum patient care and innovation in the service development of MRI
- Knowledge, skills and understanding to lead, develop and motivate others in their area of expertise.

Course Learning Outcomes

The following statements define what students graduating from the Postgraduate Certificate in Magnetic Resonance Imaging course will have been judged to have demonstrated in order to achieve the award. These statements, known as learning outcomes, have been formally approved as aligned with the generic qualification descriptor for level 7 awards as set out by the UK Quality Assurance Agency (QAA)⁶.

1. Demonstrate an in-depth knowledge and understanding of the physics principles and technology associated with MRI and apply these in practice.
2. Translate and embed the theoretical knowledge and practical skills in their role in MRI and demonstrate practice and procedural independence.
3. Critically appraise current legislation, professional documentation, policies and procedures in relation MRI, utilising these to underpin ethical and safe practice.
4. Demonstrate a systematic understanding and critical awareness of MRI patient pathways, together with an in-depth consideration of the complexities affecting patient-centred care and MRI service provision.
5. Critically evaluate your own performance to ensure that best practice is achieved at all times whilst acknowledging the limitations of your own skills and knowledge.
6. Actively contribute to the multi-disciplinary team, taking a lead role when appropriate and critically evaluating your performance within the team.
7. Critically reflect on your professional leadership skills within the workplace.

Course Design

The design of this course has been guided by the following QAA Benchmarks / Professional Standards / HCPC Competency Frameworks:

- American College of Radiology ACR Manual on Contrast Media 2021. ACR Committee on Drugs and Contrast Media (2021); The Royal College of Radiologists iRefer: Making

⁶ As set out in the [QAA Frameworks for Higher Education Qualifications of UK Degree-Awarding Bodies \(2014\)](#)

DEFINITIVE COURSE RECORD

the best use of clinical radiology (8th Ed) (2017), the NICE Guidelines Collaborative Radiology Solutions (RCR, 2016); Society and College of Radiographers Education and Career Framework (SCoR, 2016); Society and College of Radiographers Diagnostic Patient Pathways: MRI

- HCPC Standards of Education and Training (2017); HCPC Standards of Conduct, Performance and Ethics (2016); HCPC Standards of Proficiency for Radiographers (2013); Society and College of Radiographers (SCoR) Scope of Practice (2013)
- The QAA Framework for Higher Education Qualifications of UK Degree Awarding Bodies (2014); QAA Master's Degree Characteristics Statement (2020) and the QAA UK Quality Code for Higher Education (2018).

Course Structure

The Postgraduate Certificate in Magnetic Resonance Imaging comprises modules at level 7. Module Specifications for each of these modules is included within the course handbook, available to students on-line at the beginning of each academic year.

	Module	Credits	Module Type ⁷
Level 7			
	Fundamentals of MRI	20	M
	Managing Effective Care in MRI	20	M
	MRI Principles and Practice: Work Based Learning	20	M

Awards

On successful completion of the course, students will be awarded a Postgraduate Certificate in Magnetic Resonance Imaging.

Course Delivery

The course is delivered at the University of Suffolk, Ipswich Campus. Students studying part-time on the Postgraduate Certificate in Magnetic Resonance Imaging course are likely to have approximately 46 tutor structured learning hours. Tutor structured learning will be a mix of interactive lectures, seminars, workshops and students will also be required to undertake 100 hours of clinical experience in their own Hospital Trust. In addition, students will normally be expected to undertake 12 hours of independent study, including tutor set learning, in an average week but should be prepared for this to vary based on assignment deadlines and class exercises.

Course Assessment

A variety of assessments will be used on the course to enable students to experience and adapt to different assessment styles. The assessment methods used will be appropriate to assess each module's intended learning outcomes. Assessment on the course overall will be approximately 70% coursework (including case profiles, critical analysis of a patient pathway, and web-based poster presentation) and 30% examinations.

Special Features

⁷ Modules are designated as either mandatory (M), requisite (R) or optional (O). For definitions, see the [Framework and Regulations for Taught Postgraduate Awards](#)

DEFINITIVE COURSE RECORD

On successful completion of the Postgraduate Certificate in Magnetic Resonance Imaging course students will be eligible to apply for Advanced Practitioner Accreditation with the Society and College of Radiographers.

This is the one of five postgraduate courses within the University's radiography portfolio and a framework is in development, allowing the successful students from this PGC to progress to a Master's qualification from September 2022.

Course Team

The academic staff delivering this course are drawn from a team that includes teaching specialists and current practitioners. All staff are qualified in their subjects with their own specialist knowledge to contribute and are registered with the HCPC.

Course Costs

Students undertaking the Postgraduate Certificate in Magnetic Resonance Imaging course will be charged tuition fees as detailed below.

Student Group	Tuition Fees
Full-time UK	Not applicable
Part-time UK	£915 per 20 credit module
Full-time EU/International	Not applicable
Part-time EU/International	£1,215 per 20 credit module

Payment of tuition fees is due at the time of enrolment and is managed in accordance with the Tuition Fee Policy.

Academic Framework and Regulations

This course is delivered according to the Framework and Regulations for Taught Postgraduate Awards and other academic policies and procedures of the University and published on the [website](#).
