

DEFINITIVE COURSE RECORD

Course Title	BSc (Hons) Wildlife, Ecology and Conservation Science
Awarding Bodies	University of Suffolk
Level of Award ¹	FHEQ Level 6
Professional, Statutory and Regulatory Bodies Recognition	None
Credit Structure ²	360 Credits Level 4: 120 Credits Level 5: 120 Credits Level 6: 120 Credits
Mode of Attendance	Full-time and part-time
Standard Length of Course ³	3 years full-time
Intended Award	BSc (Hons) Wildlife, Ecology and Conservation Science
Named Exit Awards	DipHE Wildlife, Ecology and Conservation Science CertHE Wildlife, Ecology and Conservation Science
Entry Requirements ⁴	96 UCAS tariff points (or above), CCC (A-Level), MMM (BTEC)A science related subject* is required at grade C or above (or equivalent). Plus five GCSEs at grade C or above (or equivalent) including English, Mathematics and Science. *Suitable science related subjects include: Biology, Chemistry, Physics, Botany, Zoology, Psychology, Environmental Studies, Geology, Geography, Human Biology, Engineering and Electronics, Mathematics and Further Mathematics. Please note Physical Education and Sports Science do not count as science related subjects, and General Studies will not be considered. Interviews may be undertaken.
Delivering Institution(s)	Ipswich
UCAS Code	C180

This definitive record sets out the essential features and characteristics of the BSc (Hons) Wildlife, Ecology and Conservation Science course. The information provided is accurate for students entering level 4 in the 2022-23 academic year⁵.

¹ For an explanation of the levels of higher education study, see the [QAA Frameworks for Higher Education Qualifications of UK Degree-Awarding Bodies \(2014\)](#)

² All academic credit awarded as a result of study at the University adheres to the [Higher education credit framework for England](#).

³ Where the course is delivered both full-time and part-time, the standard length of course is provided for the full-time mode of attendance only. The length of the part-time course is variable and dependent upon the intensity of study. Further information about mode of study and maximum registration periods can be found in the [Framework and Regulations for Undergraduate Awards](#).

⁴ Details of standard entry requirements can be found in the [Admissions Policy](#) and further details about Disclosure and Barring Checks (DBS) can be found on the [University's DBS webpage](#).

⁵ The University reserves the right to make changes to course content, structure, teaching and assessment as outlined in the [Admissions Policy](#).

DEFINITIVE COURSE RECORD

Course Summary

The BSc (Hons) Wildlife, Ecology and Conservation Science degree is a broad course giving students the opportunity to study aspects of zoology, ecology, environmental and conservation science. Students on the course will experience a significant amount of fieldwork at numerous sites of scientific and conservation importance in Suffolk, and have the opportunity to study diverse wildlife and habitats abroad. Unlike similar existing degrees, this course will be multidisciplinary and provide a firm foundation in modern biology and laboratory research techniques to equip students with the skills required to pursue careers in emerging new areas. The degree will run in partnership with Colchester Zoo, and in close association with a wide range of environmental and conservation organisations. During the degree students will have the opportunity to gain professional experience and relevant employment skills by undertaking a work-based experience module.

Course Aims

The aims of the BSc (Hons) Wildlife, Ecology and Conservation Science degree are to:

- Equip students with the multidisciplinary knowledge and skills required for careers within wildlife conservation, ecology and related disciplines;
- Engage students with contemporary developments and research activity in wildlife, ecology and conservation science;
- Enable students to plan and independently carry out field and laboratory investigations competently and safely;
- Provide the skills required to analyse, interpret and evaluate scientific data and literature;
- Develop the skills necessary to communicate complex scientific data to a variety of audiences using a range of formats;
- Contribute to wildlife, ecology and conservation projects in the region and beyond.
- Widen participation in higher education and raise the local and regional expertise in wildlife, ecology, and conservation science disciplines;
- Develop students' personal, professional and employability skills;
- Enable students to become independent life-long learners.

Course Learning Outcomes

The following statements define what students graduating from the BSc (Hons) Wildlife, Ecology and Conservation Science course will have been judged to have demonstrated in order to achieve the award. These statements, known as learning outcomes, have been formally approved as aligned with the generic qualification descriptor for level 4/5/6 awards as set out by the UK Quality Assurance Agency (QAA)⁶.

Demonstrate knowledge and understanding of:

1. How living organisms function at the cellular and genetic level.
2. The importance of biological diversity and the principles of ecology that underpin effective conservation practice.

⁶ As set out in the [QAA Frameworks for Higher Education Qualifications of UK Degree-Awarding Bodies \(2014\)](#)

DEFINITIVE COURSE RECORD

3. The environmental challenges facing the world's ecosystems.
4. Research skills necessary to develop as a scientist.
5. Access, evaluate and effectively use information from a variety of sources to communicate principles related to wildlife conservation and ecology.
6. Collect, describe, interpret, analyse and present quantitative and qualitative scientific data.
7. Perform basic scientific mathematical calculations.
8. Competently, safely and ethically conduct a broad range of field and laboratory practical techniques related to wildlife, ecology and conservation science, including survey techniques, taxonomic identification of organisms and ecological impact assessments.
9. Demonstrate development of graduate key skills in the areas of improving own learning, communication, IT, problem solving, numeracy, working with others.
10. Begin to reflect on personal, academic and career progress, and set targets for development.

Demonstrate a detailed knowledge and understanding of:

11. The practices used in conservation and wildlife management.
12. The principle concepts in aquatic biology.
13. Process and analyse scientific data.
14. Synthesise, analyse and communicate information including published scientific research and reports, and draw logical conclusions from them.
15. Demonstrate an ability to select, apply and evaluate appropriate techniques involved in scientific research.
16. Apply and evaluate appropriate and published literature to scientific protocols and methodologies.
17. Demonstrate further development of graduate key skills in the areas of improving own learning, communication, IT, problem solving, numeracy, working with others.
18. Review targets for development and reflect on personal, academic and career progress.
19. Use an interdisciplinary approach to examine contemporary issues in wildlife, ecology and conservation science.
20. Demonstrate a critical understanding of the emerging concepts related to sustainable development.
21. Critically analyse the validity and reliability of a range of scientific techniques.

DEFINITIVE COURSE RECORD

22. Evaluate the significance of testing results with respect to scientific normative data.
23. Obtain and integrate science-based evidence to formulate and test current hypotheses relevant to ecology and environmental sciences.
24. Design, plan, and conduct a research dissertation and critically evaluate the significance of the outcomes.
25. Demonstrate the acquisition of problem solving techniques including the ability to critically collate and analyse original research data and draw conclusions.
26. Demonstrate the acquisition of a range of basic and specialist practical skills relevant to the ecological and conservation sciences.
27. Demonstrate autonomous use of graduate key skills and refine career aims and job application skills.
28. Exercise initiative and personal responsibility in undertaking a task (e.g. research/dissertation project).

Course Design

The design of this course has been guided by the following QAA Benchmarks / Professional Standards / Competency Frameworks:

- QAA Subject Benchmark – Bioscience (2015);
- QAA Subject Benchmark – Earth Sciences, Environmental Sciences and Environmental Studies (2015);
- Royal Society of Biology’s criteria for accreditation (2015);
- Chartered Institute of Ecology and Environmental Management criteria for accreditation;
- Chartered Institute of Ecology and Environmental Management “Ecological Skills: Shaping the Profession for the 21st Century” report (2011);
- Natural Environment Research Council “Most wanted II – Postgraduate Skills Needs in the Environmental Sector” review (2012);
- Linnean Society (2010) – “Systematics and Taxonomy - Priorities for the Future” report;
- HEA Embedding Employability Framework (2015).

Course Structure

The BSc (Hons) Wildlife, Ecology and Conservation Science degree comprises of modules at levels 4, 5 and 6.

Module Specifications for each of these modules are included within the course handbook, and are available to students on-line at the beginning of each academic year.

DEFINITIVE COURSE RECORD

	Module	Credits	Module Type ⁷
Level 4			
	Cell Biology and Genetics	20	M
	Scientific Skills	20	M
	Environmental Science	20	M
	Diversity of Life	20	M
	Ecology & Ecosystems	20	M
	Practical Field Research Skills	20	M
Level 5			
	Principles of Conservation	20	M
	Data Analysis and Statistics	20	M
	Zoological Management	20	R
	Marine and Freshwater Biology	20	M
	Research Methods and Scientific Communication	20	M
	Animal Behaviour	20	O
	Microbial Organisms	20	O
	Plant Biology	20	O
Level 6			
	Dissertation	40	M
	Adaptive Physiology	20	R
	Ecotoxicology	20	R
	Professional Development for Life Sciences	20	O
	Sustainability and Applied Conservation	20	O
	Fisheries and Aquaculture	20	O
	Work-Based Experience (WECS)	20	O

Awards

On successful completion of the course, students will be awarded a BSc (Hons) Wildlife, Ecology and Conservation Science. Students who leave the course early may be eligible for a DipHE Wildlife, Ecology and Conservation Science on successful completion of 240 credits including all mandatory modules at levels 4 and 5, or a CertHE Wildlife, Ecology and Conservation Science on successful completion of 120 credits including all mandatory modules at level 4.

Course Delivery

The course is delivered at the University's Ipswich campus, Colchester Zoo and at sites of scientific interest throughout Suffolk. Students studying full-time on BSc (Hons) Wildlife, Ecology and Conservation Science are likely to have approximately 288 tutor structured learning hours for level 4, 288 tutor structured learning hours for level 5 and 288 tutor

⁷ Modules are designated as either mandatory (M), requisite (R) or optional (O). For definitions, see the Framework and Regulations for Undergraduate Awards

DEFINITIVE COURSE RECORD

structured learning hours for level 6. Tutor structured learning will be a mix of lectures, seminars, tutorials, field and laboratory practicals, field trips, and guided activities. Students will normally be expected to undertake 36 hours of independent study in an average week, but should be prepared for this to vary based on assignment deadlines and class exercises.

Course Assessment

A variety of assessments will be used on the course to enable students to experience and adapt to different assessment styles. The assessment methods used will be appropriate to assess each module's intended learning outcomes. Assessment on the course overall will be approximately 70% coursework (including essays, reports, presentations, posters, reflective learning journals and research projects), 20% examinations, and 10% practical assessments.

Special Features

This course is delivered in partnership with Colchester Zoo to teach the Zoological Management module.

Course Team

The academic staff delivering this course are drawn from a team that includes teaching specialists and current practitioners. All staff are qualified in their subjects with their own specialist knowledge to contribute.

Course Costs

Students undertaking BSc (Hons) Wildlife, Ecology and Conservation Science degree will be charged tuition fees as detailed below.

Student Group	Tuition Fees
Full-time UK	£9,250 per year
Part-time UK	£1,454 per 20 credit module
Full-time EU/International	£14,598 per year
Part-time EU/International	£2,433 per 20 credit module

Payment of tuition fees is due at the time of enrolment and is managed in accordance with the Tuition Fee Policy.

Students will be required to pay additional costs for printing course material (lecture notes, posters, dissertation manuscripts, recommended readings), amounting to a maximum of £150 per year, payable as required.

Students are likely to incur other costs for optional field trips (e.g. flight cost for trip to UmPhafa nature reserve in South Africa at level 5), and other optional extracurricular activities, amounting to approximately £1500 for the duration of the study programme. All essential field trip costs will be included in the course fees.

Academic Framework and Regulations

This course is delivered according to the Framework and Regulations for Undergraduate Awards and other academic policies and procedures of the University and published on the [website](#).
